

ClearNote™ Multi Branch Edition

Core Telecom's ClearNote™ Multi Branch Edition software coupled with our enterprise-class KeyNote™ phone systems, is specifically designed to give multi-branch locations powerful VoIP capabilities, and efficiently unify communications across complex, distributed networks. ClearNote™ MBE delivers a flexible balance of centralized management, and distributed capabilities.

- ✓ **Branch to Branch Dialing** provides desk to desk dialing between offices, bringing colleagues in different locations closer together. *Across the street or around the world.*
- ✓ **Unified Auto Attendants** allows your company to have "one number" to contact all locations in the organization. Location-specific needs (such as language) can be delivered while ensuring corporate standards are presented.
- ✓ **Find Me, Follow Me** allows employees to be continuously connected to the office no matter where they are.
- ✓ **Multi-party Conferencing** provides simplified access to powerful collaboration tools that can be used by teams, departments and even customers.
- ✓ **Voicemail to E-Mail and Group Mail** allows those valuable voice messages to be delivered to your email inbox as a wav file. You can retrieve your emails from any location. Management can use group mail to communicate to their teams.
- ✓ **KeyStone™ API** lets your business integrate crucial applications such as CRM and Point of Service (POS) applications with the telephone system.
- ✓ **Web-based** management allows you to handle routing programming changes (such as voicemail and user name) without requiring a technician or engineer onsite.

Core Telecom Innovations Inc is passionate about our customers. We never give up, because relentless customer service drives every decision we make. We believe that delivering quality without compromise differentiates us from our competition. We are determined to deliver a level of satisfaction such that every one of our customers would be pleased to act as a reference..

INNOVATIONS Inc

the future of telephony

True Unification

Traditionally, companies with multiple branches have a painful challenge when trying to realize a unified communication structure. KeyNote and ClearNote work together to bridge the geographical divide and unify not only the organizational communications, but management and reporting as well.
